**RE: 998 Tunnel & Vault, Corridor B, and Room 402 (B991) Facility Disposition RSOP Notification**

Dear Mr. Legare:

The Colorado Department of Public Health and Environment, Hazardous Materials and Waste Management Division has reviewed the February 3, 2004 notification that the Facility Disposition RSOP will be utilized for the disposition of the 998 Tunnel (Corridor A) & Vault, Corridor B, and Room 402 of Building 991. Although we previously provided verbal approval that this work may proceed, as identified in previous Contact Records dated January 7 & February 2, 2004, we are hereby providing written agreement that these areas of B991 meet free-release levels and may be dispositioned utilizing the Facility Disposition RSOP and as specifically identified in this Notification.

Although not specifically stated in this document, it is our understanding, based on conversations with JR Marshall and Duane Parsons with KH, that the previously identified transuranic contamination in Corridor B has been appropriately remediated. The remediation of this transuranic contamination, which was identified in the RLCR, is expected to be properly discussed in the PDS Report for B991.

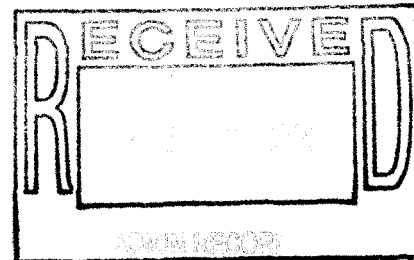

If you have any questions regarding this correspondence please contact me at (303) 692-3367 or David Kruchek at (303) 692-3328.

Sincerely,

Steven H. Gunderson  
RFCA Project Coordinator
